

Scanlan Sponsors:

Tara Karamlou, MD

INSTITUTION/HOSPITAL: Phoenix Children's Hospital

SPECIALTY: Pediatric cardiac surgery

AVAILABILITY FOR AWARDEE VISIT: Any time after January 25, 2017

DURATION OF AVAILABILITY FOR AWARDEE VISIT: Flexible, 1- 4 weeks as desired by trainee

SUMMARY OF AWARDEE OFFERINGS AND EXPERIENCE: We could offer a diverse experience including operative time, both here at Phoenix Children's and at our affiliated adult hospital, Mayo Clinic, where our adult congenital patients are operated and recovered. Our patient population is a unique one in the US, and the awardee would be exposed to the complexities inherent in such a diverse patient mix. We also have one of the busiest heart transplant programs here at PCH and the scholarship applicant could observe these cases as well. The other facets of the experience would include taking part in weekly research conferences where regional and national projects are discussed, as well as participating in multidisciplinary case conferences. The awardee would (if interested) be available to round with our CICU team and attend weekly outpatient clinic on Friday', thus understanding the importance of all parts of the longitudinal patient experience in congenital cardiac surgery. We have a strong and committed team that will enrich the potential educational opportunity.
